

WorkFast Programs

Short-term training for transitional workers

At Customized Training Services, we are working hard with our partners in industry, education, government and non-profit organizations to develop Hennepin Technical College's (HTC) *WorkFast Programs* – short-term intense training programs that lead to employment – for Minnesota workers. Our goal is to offer quality, stackable training that results in competitive skills leading to new and enhanced opportunities for graduates. In these economically challenging times, we need to utilize all workforce resources available to help address these employment and training needs.
