Guidelines for Students Isolating or Quarantining due to COVID-19

We want you to be successful and complete your coursework. Communicate with us if you need to isolate or quarantine due to COVID-19 so we can help you through this time.

Definitions

Isolation: Isolation means keeping people who have tested positive for COVID-19 away from people who do not or may not have COVID-19. People in isolation should have their own bedroom and bathroom, if possible. Students with COVID-19 should stay at home and can further reduce the spread of COVID-19 within their household by following guidance from the Centers for Disease Control and Prevention (CDC), If You Are Sick or Caring for Someone (www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/index.html).

Quarantine: Quarantine means keeping people who have been exposed to COVID-19 away from other people. People who are identified as a close contact of someone with COVID-19 and who do not have symptoms of COVID-19 should stay away from others for 14 days past the last date of the contact.
