ABOUT Hennepin Technical College

Learn the technical skills needed to say “I made it!”

Hennepin Technical College is an innovative higher education institution that focuses on hands-on training, excellence in education, and job placement of our graduates. With a 99% job placement rate, we excel in providing our students with all they need to boost their career prospects during life after graduation. One of the ways we uphold this level of excellence is through our steadfast partnerships with local employers and our sense of community through our diverse student body. With over 45 fields of study – Hennepin Technical College has a place for everyone. Leading in the value, flexibility, and affordability, HTC is a place where anyone's interest and career goals become a reality. It is our goal, and our privilege, to make sure every student succeeds at Hennepin Technical College.

The Transportation Program at HTC provides a combination of classroom work and field training. Students learn from highly qualified instructors with more than 10 years of industry experience.

AUTO BODY COLLISION TECHNOLOGY

Auto body repair and refinishing technicians are skilled professionals who diagnose and repair vehicles damaged due to collisions, corrosion and wear. At HTC, you'll learn about Auto Body Collision Technology from instructors who have real-world experience meeting industry standards. With a combination of classroom education and hands-on training repairing cars, you'll be prepared to work in auto body repair shops and dealerships. You'll know how to estimate auto repair work on damaged vehicles.

In our 16,000 square feet lab space, you'll learn to use power and hand tools to repair or replace body parts, and you'll complete painting work using cutting edge technology. For skills and confidence as an auto body technician, count on HTC training.

AUTOMOTIVE TECHNOLOGY

Looking for the key to success as an automotive professional? Start at HTC where you will become highly skilled in using sophisticated diagnostic and repair equipment. It is all part of your training in the diagnosis, repair, and preventive maintenance of automobiles and light trucks. You will learn from highly qualified instructors and be ready to diagnose, determine

condition, and repair or replace various components in engines, transmissions, differentials, air conditioners, fuel systems, emission controls, ignition and electrical systems, and brakes and suspensions. You will gain the skills employers are looking for in an automotive technician. That is why great training at HTC puts you on the road to success.

Automotive Technician

Diploma
Automotive Technician

MEDIUM/HEAVY TRUCK TRANSPORTATION

Training in HTC's Medium/Heavy Truck Technology program gives you a head start on a career as a technician in the trucking industry. That's because you divide your learning time between college courses in the classroom and skill development through paid internships at truck repair companies. You will learn about electrical and electronic systems, steering and suspension, air and hydraulic ABS brake systems, and vehicle maintenance. Plus, you will perform diesel engine troubleshooting, overhaul procedures, and tune-ups on both mechanical and electronic engines. Then add in clutch, transmission, and drive axle diagnosis, repair, and overhaul along with preventive maintenance procedures. It's a blend of classroom theory, shop demonstrations, and hands-on skill development that prepares you for success on the job.

Get started in 5 easy steps!

Apply for Admission

1

New students may submit their high school transcript or GED certificate to Enrollment Services.

Transfer students from previously attended non-Minnesota State system colleges should submit their college transcript(s).

Visiting students can register for courses online without submitting a college application.

You may be charged a **\$20 application fee** that should be paid online when submitting the application.

Determine How to Pay for College

2

Financial aid is available for students who qualify. Access to grants, loans, scholarships, and/or work-study begins by completing the Free Application for Federal Student Aid® (FAFSA). Students must have a high school diploma, GED, or its equivalent, and declare an eligible major, in order to receive Federal Title IV financial aid funds. Please apply early to allow time for processing. Hennepin Technical College's FAFSA School Code is **010491**.

Complete Placement Testing

3

Schedule your ACCUPLACER placement testing appointment.

You may be exempt from some or all of your placement tests under certain conditions.

Complete New Student Orientation

4

Once your placement testing requirements have been met, you are ready for New Student Orientation.

Register for Classes

5

When you have completed the steps above, you are ready to register for classes. Start today! **hennepintech.edu/getstarted**
