

**Hennepin Technical College** offers workplace safety and environmental compliance training to general industry, public works groups, the construction industry, educational institutions and government agencies. All of our instructors have real-world experience, as well as substantial education and professional qualifications. We incorporate your policies and procedures into the training and work with you to ensure training materials comply with appropriate policies and standards. We are happy to provide a single class or cover your entire training calendar; no job is too small or too large.

The following course list includes many of the topics we offer. If you don't see what you need here, please contact us. Our experts are ready to create the courses you need.
